12.Tree Map

- **Drag sub-category to columns and sales to rows then select Tree Map from the show me panel.**
- **To customize colour based on categories or earnings drag either ship mode or profit onto colour in the marks card.**

Output:

13.Donut Chart

Stage 1: Create foundation

- **Create the base:** Go to analysis create calculated field. Name it donut base and enter in the formula area.
- **Setup the Rows:** Drag this donut base field into the rows shelf twice. On the marks card change both types to pie and select entire view from the top toolbar.

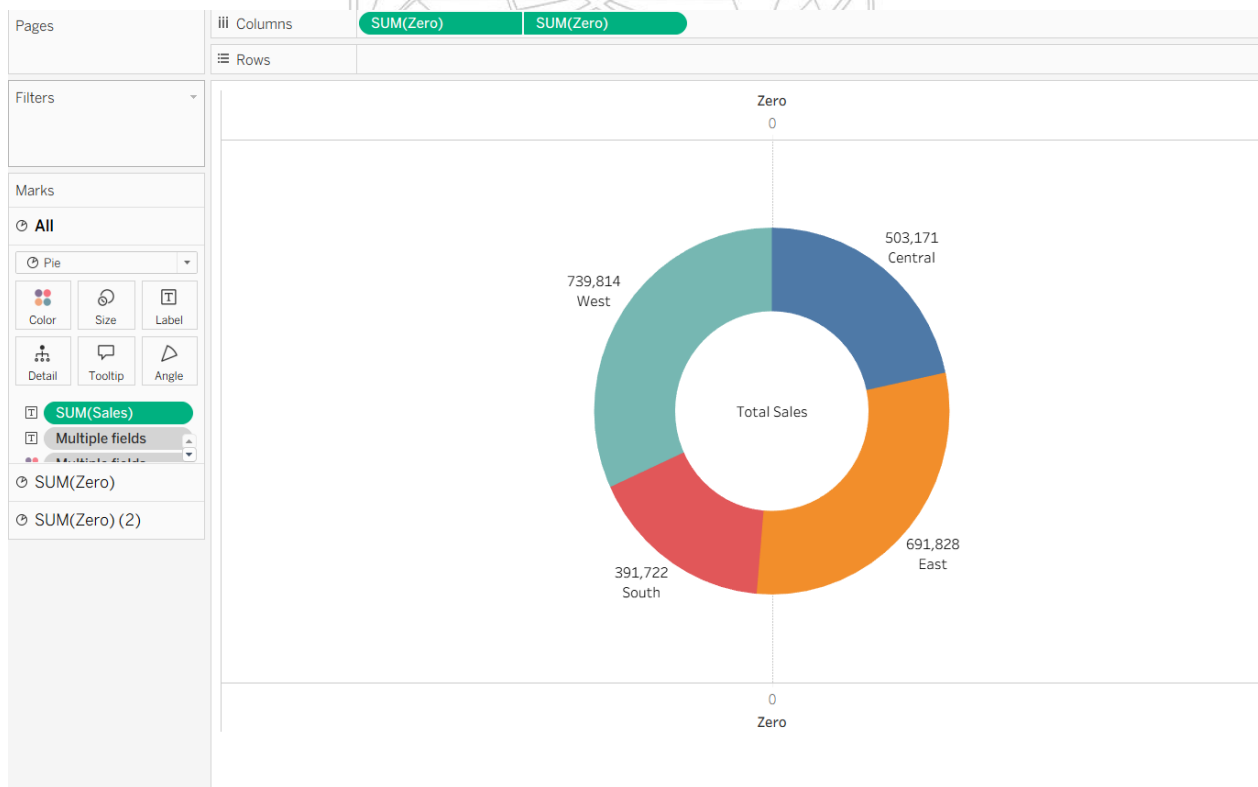

Stage 2: Form Donut & colour

- **Combine Axes:** Right-click on the second pill inside the rows shelf and select dual axis.
- **Add Region Colours:** Go to the first pie marks card and drag region onto colour.
- **Create the Hole:** Increase the size of the first pie, and slightly decrease the size of the second pie (colour the second one white to create the donut hole effect).

Stage 3: Add Labels & Totals

- **Outer Chart Labels:** On the first pie, drag region to label, sales to label, and sales to angle.
- **Centre Total:** Open the format pane for the second pie mark. Under the default text settings, simply set it to:
“Total sales <SUM(Sales)>”
Make sure the text is centred and styled Appropriately.

Output:

14.Map Chart

- **Build the Map:** Drag state to the workspace to auto-generate the map, then change the marks type from automatic to map or filled map.
- **Add colour:** Drag sales onto colour, click the colour tile, and choose the purple palette.
- **Labels & Filters:** Drag both state and sales onto label to display values, and drag region to the filters shelf (select all).
- **Details & Background:** Drag profit onto tooltip for hover data, then go to the top menu: Map>map layers and set the washout to 70%.

Output:
