

Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study

1.2 – Purpose of the Project

The purpose of **Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study** is to analyze the food choices and dietary habits of college students using interactive Tableau visualizations. The project aims to transform raw survey data into meaningful insights that help identify eating patterns, nutritional trends, and lifestyle factors affecting students' health.

By presenting the data through dashboards and stories, the project enables users to easily understand student dietary behaviour and make informed decisions. It also provides practical dietary strategies and recommendations to encourage healthier eating habits, improve nutritional awareness, and support colleges in planning effective health and wellness initiatives.

Benefits of the project

The Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study offers several benefits:

- Improves understanding of student food habits by analyzing dietary patterns and eating behaviours.
- Provides interactive visualizations that make complex data easy to explore and understand.
- Identifies nutritional trends such as calorie intake, meal frequency, exercise habits, and healthy eating practices.
- Supports informed decision-making for students, educators, and college administrators using data-driven insights.
- Encourages healthier dietary choices by highlighting areas where eating habits can be improved.
- Saves time in data analysis through interactive dashboards and filters instead of manually reviewing large datasets.
- Promotes nutritional awareness by helping students understand the relationship between diet, lifestyle, and overall health.

Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study

- Assists colleges in planning wellness programs and nutrition-related initiatives based on the analyzed data.
- Enhances data visualization skills by demonstrating the effective use of Tableau dashboards, charts, and stories.
- Provides actionable recommendations that can contribute to healthier lifestyles and better long-term well-being.
